Laravel + Claude AI Practical Test

School Financial Reporting & PDF Receipt Module

TASK OVERVIEW

You will receive:

- Admin Template
- Static HTML dashboard design

Please download template and report pdf folder from below google drive link

https://drive.google.com/drive/folders/19gdF_9EO2-ZPFM7REvq-b6JYylyAxJam?usp=sharing

Your task is to:

- Integrate the provided template into Laravel
- Develop backend APIs
- Connect frontend with APIs
- Make reports fully functional
- Generate professional PDF reports & receipts

⚠️ Important:
We are NOT evaluating UI creativity.

We are mainly evaluating:

- Laravel skills
- API development
- Report generation logic
- PDF generation quality
- Financial calculations
- Smart usage of Claude AI

IMPORTANT REQUIREMENT

Candidate MUST use:

- Claude AI
  OR
- ChatGPT
  OR
- Any AI coding assistant

for:

- Template integration
- CRUD pages
- Dashboard integration
- HTML adjustments
- Receipt/PDF layout generation
- JavaScript/API integration

We want to evaluate:

- How fast candidate develops using AI
- Prompt engineering capability
- Ability to improve AI-generated code
- Ability to create professional reports quickly

GIVEN RESOURCES

We will provide:

- Admin Template ZIP
- Static HTML screens

Candidate must use the same template.

No redesign required.

MODULES TO DEVELOP

1. Authentication

Create:

- Login
- Logout

Role:

- School Admin only

---

2. Income Module

Create:

- Add Income
- Income Listing

Fields:

- Student Name
- Fee Type
- Amount
- Payment Date

---

3. Expense Module

Create:

- Add Expense
- Expense Listing

Fields:

- Expense Title
- Category
- Amount
- Expense Date

4. Payroll Module

Create:

- Add Payroll
- Payroll Listing

Fields:

- Employee Name
- Salary
- Bonus
- Deduction
- Net Salary

Formula:

```
Net Salary = Salary + Bonus - Deduction
```

5. MAIN TASK — REPORT MODULE (MOST IMPORTANT)

Candidate must create working:

- Report APIs
- Dashboard calculations
- PDF reports
- Receipt generation

FINANCIAL REPORT

Generate:

- Total Income
- Total Expenses
- Total Payroll

- Net Profit/Loss

Formula:

```
Net Profit = Income - (Expenses + Payroll)
```

REPORT FILTERS

Support:

- Monthly filter
  OR
- Date range filter

DASHBOARD SECTION

Dashboard cards must display dynamic data:

- Total Income
- Total Expenses
- Total Payroll
- Net Profit

PDF & RECEIPT GENERATION (VERY IMPORTANT)

Candidate must generate:

1. Fee Receipt PDF

After income entry:

- Generate professional fee receipt PDF

Receipt should include:

- School Name
- Receipt Number
- Student Name
- Fee Type
- Amount
- Payment Date
- Signature/Footer

---

2. Financial Summary PDF

Generate professional PDF report with:

- Income summary
- Expense summary
- Payroll summary
- Net profit/loss

IMPORTANT EVALUATION AREA

We specifically want to check:

- How professionally candidate creates PDF reports
- How clean receipt format is
- PDF design quality
- Report structure
- Print-ready formatting
- Table formatting
- Calculation accuracy

Candidate may use:

- Claude AI
- DomPDF
- Snappy PDF
- Any suitable Laravel PDF package

IMPORTANT EXPECTATION

The provided template must NOT remain static.

Candidate must:

- connect forms
- connect tables
- connect dashboard
- integrate APIs
- generate working reports
- generate proper PDFs

TECH STACK

Mandatory:

- Laravel 10/11
- MySQL
- REST APIs

Frontend:

- Use provided template only

DELIVERABLES

Candidate must submit:

1. Complete Laravel project
2. Working database
3. SQL file
4. Postman collection
5. README file
6. GitHub repository
7. Claude AI prompts used during development

Make all these video and share with us on google drive

TIME LIMIT

1 Day

EVALUATION CRITERIA

Laravel Skills

- API development
- Database structure
- CRUD functionality
- Report calculations
- Clean coding practices

Reporting Skills

- Financial logic
- PDF quality
- Receipt formatting
- Report presentation

AI Usage

- Smart use of Claude AI
- Speed of execution
- Prompt engineering quality
- Ability to improve AI-generated code

IMPORTANT NOTE

Do NOT waste time redesigning frontend.

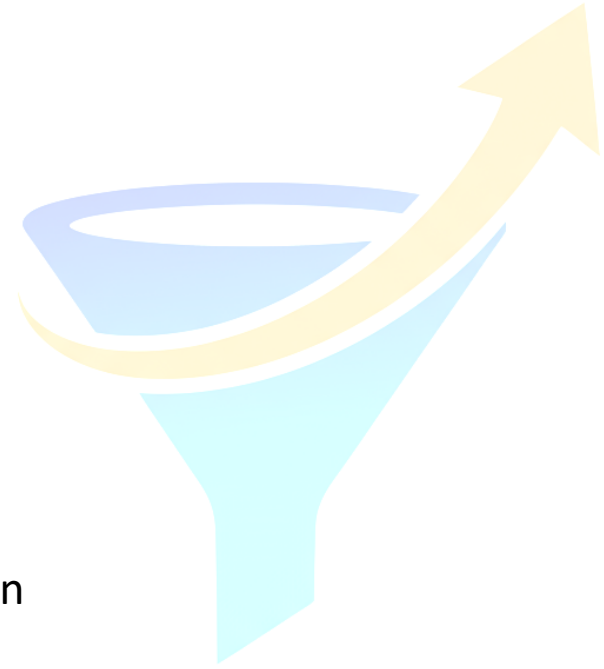

Use the provided template and focus on:

- Functional reports
- Dynamic dashboard

LEADNEXA
Consulting

www.leadnexa.in

- Professional PDFs
- Clean APIs
- Proper Laravel integration
- Accurate calculations
